Digimode Consulting Group provides Business Intelligence (BI) and Managed Reporting solutions that help companies measure performance and drive profitability.

Most firms, regardless of industry, deal with individual requirements to provide the information needed to make timely decisions. Digimode Consulting Group's Business Intelligence (BI) and Corporate Performance Management (CPM) solutions have been built with these requirements in mind. Our extensive industry experience and knowledge enables us to bring high impact best of breed BI and CPM solutions to a wide cross-section of businesses.

Our solution provides a flexible reporting and analytical platform that grows with the needs of your business. Our solution empowers the entire enterprise to better understand and manage information, make quick and informed decisions and build competitive advantage.

Our solution is built using Industry leading technology from companies including Microsoft and Cognos. Needless to say, this translates into immediate ROI for our clients who benefit from these companies ongoing commitment to excellence.

Digimode Business Intelligence

Digimode Business Intelligence – Sales Analytics

Drawing on our many years of experience in assisting Manufacturers and Distributors solve their business problems, Digimode Consulting Group has created Business Intelligence for their clients. This solution is intended for companies of all types.

Digimode Business Intelligence enables effortless data exploration. Data can be organized under logical headings such as fiscal periods, customer type, division, warehouse, and item categories - whatever makes the most sense to your Company.

Digimode Business Intelligence lets you explore multidimensional information by simply pointing and clicking. Drill down through increasing levels of detail, then slice and dice to view different dimensions, such as item margin by customer type.

Profitability is vital to your company's success and margin analysis is where you start. Digimode Business Intelligence gives you the power to maximize your margins by providing you with key information at the touch of a button. The solution gives you the power to turn analyses into accurate high impact corporate performance measurement (CPM) reports quickly and easily. Digimode Business Intelligence focuses on the exceptions and easily identifies your company's key strengths and weaknesses.
